Introduction

Under UK legislation that came into force in April 2017, UK employers of more than 250 employees are required to publish their gender pay gap. Genome Research Limited (GRL) embraces this and is committed to increasing gender pay transparency.

This report sets out the gender pay gap figures at GRL on April 5, 2021.

The Wellcome Sanger Institute, Connecting Science, Wellcome Genome Campus and our Enterprise and Innovation arm operate under the name of Genome Research Limited (GRL). GRL is a wholly owned subsidiary of the Wellcome Trust. Our activities are in the fields of Genomes and Biodata and are closely interlinked. GRL employs 1104 people (55% women; 45% men), this gender pay gap report covers the whole of GRL.

GRL is committed to fostering an inclusive, stimulating and rewarding culture where everyone can thrive and diversity is celebrated. Employees are supported to reach their full potential and are valued for their differences in background, experience and perspective. We are proud of the comprehensive support we offer staff in all aspects of their working life and that this sets us apart from other workplaces. We continue to seek new and innovative initiatives and benefits to help show our staff how much they are valued and to maintain our position, as a great place to work.

We have been examining our gender pay gap data in detail for a number of years and continue to use this as one of a suite of mechanisms to ensure that we are supporting and growing a diverse talent pool. We have made a commitment to bring down our overall median gender pay gap to +/-5% at each contract grade by 2022 and have developed an action plan to deliver on this. As of March 2021, 3 pay grades out of 10 fell outside of this target (two pay grades at 6.82% and 6.46% favouring men; and the most senior pay grade favouring women -6.97%).

Our Campus-wide programme of activity supporting Equality in Science was established in 2011. With partners on Campus, we explore issues affecting minoritised and historically excluded groups, look to inspire our community, develop discussion and drive changes in practices and policy.

We are an active member of Advance HE’s Athena Swan Charter which recognises work undertaken to address gender equality. We were delighted to achieve an Athena Swan Silver Award in 2020, which demonstrates the positive and sustained impact that our gender equality activities are having on our staff since we first became members of the Charter in 2013. We recently outlined how GRL has risen to the challenge of supporting its staff and students throughout the ongoing pandemic in an invited contribution to an Athena SWAN workshop and blog.

Workplace Environment

We believe that cultivating a healthy and supportive workplace is key to helping our researchers, students, and staff develop their skills and experience. Our family-friendly environment permeates the fabric of our Campus and our comprehensive range of progressive policies support everyone to achieve a positive work-life balance. Our Equality, Diversity and Inclusion strategy is a golden thread that runs throughout our policies, practices and approaches and continues to focus on impactful and sustained changes.

We submitted our first Working Families benchmark in 2021 and were delighted to be amongst the top 4 for Research Institutes and Universities that entered. Key strengths that were highlighted included GRL’s enhanced paid maternity and shared parental leave policies; work-life balance being viewed as a collective responsibility and equity and inclusion being explicit core values. In 2022 we will be further enhancing our family-friendly suite of policies and support to include extending provision of paid paternity leave; paid time off for fertility treatment and improving the support and guidance that is given to people taking parental leave and also to their line-managers.
Our Gender Pay Gap

Pay

On 5 April 2021, GRL had a median gender pay gap of 7.80% (2020: 8.70%) which is well below the national average of 15.5% (Office for National Statistics, 2020). The mean gender pay gap was 13.40% (2020: 11.56%), compared to 14.6% for the overall UK mean average.¹

Whilst our figures are lower than the national average gender pay gaps, we recognise that we still have work to do to address gender imbalance.

Deeper analysis of our figures tell us that our gender pay gap largely arises due to vertical segregation and clustering of men and women in certain job families – for example, we see higher proportions of men in IT and software development roles (for which the market also tends to command a premium salary compared to other roles at the same grade). The highest proportion of women is at the Lower Middle Quartile, where there are higher percentages of women in roles such as Research Assistant.

Bonus Gender Pay Gap

GRL does not operate a formal bonus scheme. The majority of bonus payments included in GRL’s gender pay data cut of 5 April 2021, relate to non-consolidated awards that were paid when an employee reaches the maximum of the pay range as part of the organisation’s annual pay review We provide clarity to our employees and managers on the types of activities and achievements that may be eligible for an occasional bonus and have also introduced moderation at a senior level of all proposed bonuses to ensure greater consistency and equity.

¹ Figures are for GRL employees only and do not include Wellcome.
Where are we taking action?

Workplace Environment

We will continue to work closely with leadership and staff across the organisation to develop actions and initiatives that ensure that we are an inclusive, fair and equitable place to work. In 2022 we will prioritise:

• Continuing to ensure that our people related processes, behaviours and ways of working align with our inclusive culture
• Implementing our HR systems strategy to enable us to scrutinise real-time high-quality people and inclusion data to facilitate an agile data-led approach to diversity analysis and reporting across our pay grades
• Rolling-out targeted programmes to support talent management and succession planning
• Focussing on recruitment to senior roles to ensure fair, transparent and inclusive processes
• Re-building our pay framework to ensure greater transparency across job families/pay grades.
• Defining clearer career paths for roles which will provide clarity on development opportunities and career progression options.
• A strategic focus on IT and software development roles.
